Industry	Information Technology
Employment Type	This is a full-time on-site permanent role, 5 days a week
Job Level	This is a Mid-Senior Level Role with 03 - 05 years of experience
Education	BS(CS) / BS (SE)
Location	G-8, Islamabad

About Your Role:

We are seeking an experienced Android Developer to join our mobile development team for a 6-month contract. The selected candidate will be responsible for developing high-quality Android applications. The role involves implementing new features, optimizing the application's performance, and ensuring the app's scalability and maintainability. You will work closely with UI/UX designers, backend developers, and other team members to deliver efficient and well-designed mobile solutions.

Your Impactful Goals Will Include:

- Understand and implement business logic into functional Android applications.
- Collaborate with the design team to build intuitive and high-quality user interfaces.
- Write clean, efficient, and maintainable code with thorough documentation.
- Perform Unit and Integration Testing for quality assurance.
- Work with the Team Lead during system integration and debugging phases.
- Ensure timely delivery of features, meet project deadlines, and support live applications.
- Stay up to date with Android development trends and adhere to best coding practices.
- Demonstrate strong problem-solving skills to quickly identify and fix bugs or performance bottlenecks.

Functional Skills Requirement:

- 3 to 5 years of experience in Android development.
- Proficiency in Kotlin and Java.
- Experience with RxJava for managing asynchronous tasks, data streams, and reactive programming.
- Strong understanding of Android SDK, Android Studio, and related development tools.
- Solid knowledge of architectural patterns such as MVVM, MVC, and their implementation in Android projects.
- Experience with RESTful APIs and third-party libraries (Retrofit, OkHttp).
- Knowledge of Android UI/UX design principles, patterns, and best practices.
- Familiarity with version control tools like Git.
- Experience in using local data storage solutions such as SQLite, Room, or Realm.
- Strong understanding of threading, concurrency, and performance optimization in Android apps.
- Experience with Google Play Store deployment and knowledge of play store guidelines.
- Familiarity with Firebase services (Analytics, Crashlytics, Authentication) or cloud platforms like AWS/Azure.
- Knowledge of mobile security practices and testing methodologies for Android apps.
- Excellent communication skills in English.
